

KMB AVIATION CONSULTING GROUP INC.

KMB provides Final Engineering and Construction administration for its aviation clients (CATSA, Transport Canada, Airport Authorities and Air Cargo Companies) for Airport projects from conception to completion of construction and commissioning. Services include airport concept designs, Design of CATSA requirements, Class D, C, B Estimates, baggage system design and delivery, land use issues and approvals, environmental planning, engineering design, Terminal passenger flow reviews, baggage handling system design reviews, Building Code reviews and detailed Engineering drawings and site project management including on site Airport inspections.

KMB's project managers are extensively trained, experienced, have Airside security clearances and knowledgeable in the aviation and construction industry. Our design professionals have the capability to manage all stages of an Airport development project.
